PROUDLY MADE IN THE USA

### *The Bella Difference . . .*

*For more than three decades our associates have been producing some of the finest architectural hardware products in the industry. Our engineers and artisans have been schooled in the tradition of the old world craftsman who preceded them. Craftsman who lived and died by words like Quality, Value, Service and Integrity. Craftsman with a unique respect for fine materials and the machines that form them but who also understood that quality results not from tools alone but from the skilled hands that use them. People who put the pride in "made in the USA."*

*At Bella old world craftsmanship and today's advanced technologies combine to create truly exquisite entry and display products. Come experience the Bella difference.*
